International Exhibition on Logistics Industry

January

21 22 23 2016

Mahatma Mandir,
Convention and Exhibition Centre, Hall-1
Gandhinagar, Gujarat, India

What Is Logistics Asia ?

- Logistics Asia is creating Benchmark for Logistics Exhibition in Gujarat.
- Organizing 3 Days International Exhibition & 2 Days Conference & Networking At Mahatma Mandir, Gandhinagar, Gujarat.
- We are associating and inviting Business delegates & Visitors + Government Authorities + Industries Associations + International trade consulates.

Why Logistics Asia ?

Logistics Asia is conceptualized with the background to provide a platform

- To enhance the network of the Indian firms engaged in logistics and Export/Import oriented businesses for providing the strategic inputs of government policies and incentives for bridging the gap of communication.
- Setting in process the due diligence for exports/Imports, financials & accounting processes involved.
- Majorly about the potential business partnerships that can evolve across the globe as India gears up for international exposure.

Why Logistics Becomes Important ?

Every business establishment is aimed at providing quality, timely and effective products or services to their customers as a means of retaining them and opening more customer doors.

Logistics Provides the back bone of all the supply-chain in the world for the global businesses.

Logistical support has gained importance in international marketing as a result of technological advancements in information and communication technology.

Logistical planning is entirely an important part of business nowadays. How quickly and reliably goods are delivered to customers can mean the difference between retaining your customers and losing them.

A great deal of business logistics comes under the heading of marketing and specifically, distribution. The planning phase is the most important followed by good implementation of a logistical plan. It is not only the speed of delivery that matters, but also the product quality and customer service.

Logistics – India

India is growing fast as a business hub for the world and creating immense opportunities for trading to supply and fulfill requirements of the world but Logistics infrastructure of India is still improving to the international standard. Indian logistics industry is expected to grow at 15% to 20% per annum, According to a Cushman and Wakefield report.

India's need for infrastructure creation in the logistics sector is striking. In just a decade India has seen its economic size more than double to \$ 1.37 trillion (2012) and total foreign merchandise trade multiply from 20% of GDP (2000) to 42% of GDP (2014).

Survey conducted by Transport Intelligence (Ti) 2013 ranks India as the second most attractive logistics market in the future after China till date.

As a fast growing economy with one of the largest consumer markets, industries such as automobile, pharmaceuticals, FMCG and retail will drive the demand for logistics in India in the future.

Planning Commission has budgeted for an initial infrastructure investment of Rs. 4.1 trillion (9.95% of GDP) over the 12th Five Year Plan (FYP) period (2012-2017) in order to sustain a real GDP growth rate of 9% over the period. This is almost double the amount proposed under the 11th Five Year Plan (2007-2012).

Regulations around rationalization tax structures, proposed introduction of GST and prevention of overloading are creating a favorable environment in which the sector can flourish.

India spends around 13% of its GDP on logistics, higher than US (10%), Europe (11%) and Japan (10%).

Make in India = Success = Logistics Asia

- Make in India can be more successful only if logistics in India is put in order.
- Cut Logistics cost to 'Make More' In India.
- The Success Of 'Make In India' Strategy is dependant on the performance of Indian logistics.
- Quality Logistics in India is the baseline of make in India to attract Foreign investment.
- The 'Make in India' Campaign has to implant itself within the global supply chain network to participate and gather a greater share in the world trade.

Logistics Asia – Why Gujarat

Gujarat has always distinguished itself as the leading state in India for logistics and EXIM related businesses. The state alone accounts for more than 40% of the total exports from India.

Natural advantages include about 1600 km long coastline, highest number of operating ports, excellent road and rail infrastructure, a large industry base, number of logistic players and the entrepreneurial spirit that benchmarks the businessmen of Gujarat.

Gujarat is full prioritized for north India & central India logistics that makes Gujarat a center for best connectivity for export/Import.

Gujarat has many old, new & upcoming ICD centres which promotes great business opportunities for Gujarat, This will also help Logistics to emerge itself to the world To lead the industry.

Continual support by the successive governments with industry friendly policies have made the state ideally poised for growth of the logistics and exim oriented businesses. The businesses here have global outlook and they continue to look towards the newer opportunities for growth.

Mahatma Mandir is one of the best venue for event and the finest exhibition centre located at Gandhinagar in capital city of Gujarat.
